

ACTIVITY SHEET

KS2 Weather and Climate

Draw pictures of the seasons

For each season research the average temperature, rainfall, wind direction, wind speed and sunshine hours. Think about things that happen each season and draw a picture.

Spring	Summer
Autumn	Winter

Climate change

Climate change refers to a large-scale, long-term shift in the planet's weather patterns and average temperatures.

Climate change is the long-term shift in average weather patterns across the world. Since the mid-1800s, humans have contributed to the release of carbon dioxide and other greenhouse gases into the air. This causes global temperatures to rise, resulting in long-term changes to the climate.

Create a poster

Create a poster including some of the things that you could do to reduce your impact on climate change.
